

XII.—ABNORMAL ANTLERS OF A KASHMIR STAG  
(*CERVUS HANGLU*)

(With a photo)

I enclose a photograph of the head of a barasingh shot by me. It appears exceptional in view of the fact that it has only 6 points.

The following are the measurements.

Shot in Basmai Nullah, Sind Valley, Kashmir, September 16th.

Right horn	...	43"
Left horn	...	39"
Widest, tip to tip	...	42½"
Circumference at base	...	7½"
,,    in middle	...	8¼"

MURREE,  
June 4, 1928.

G. M. GAMBLE,  
Capt.  
The Sherwood Foresters.
